

# JOURNEY OF DISCOVERY

# Welcome to NSF Day!

Wednesday, August 29, 2018

# NSF Mission

Photo Credit: Maria Barnes, NSF

Basic research ... results in general knowledge and an understanding of nature and its laws. This general knowledge provides the means of answering a large number of important practical problems....

- Vannevar Bush

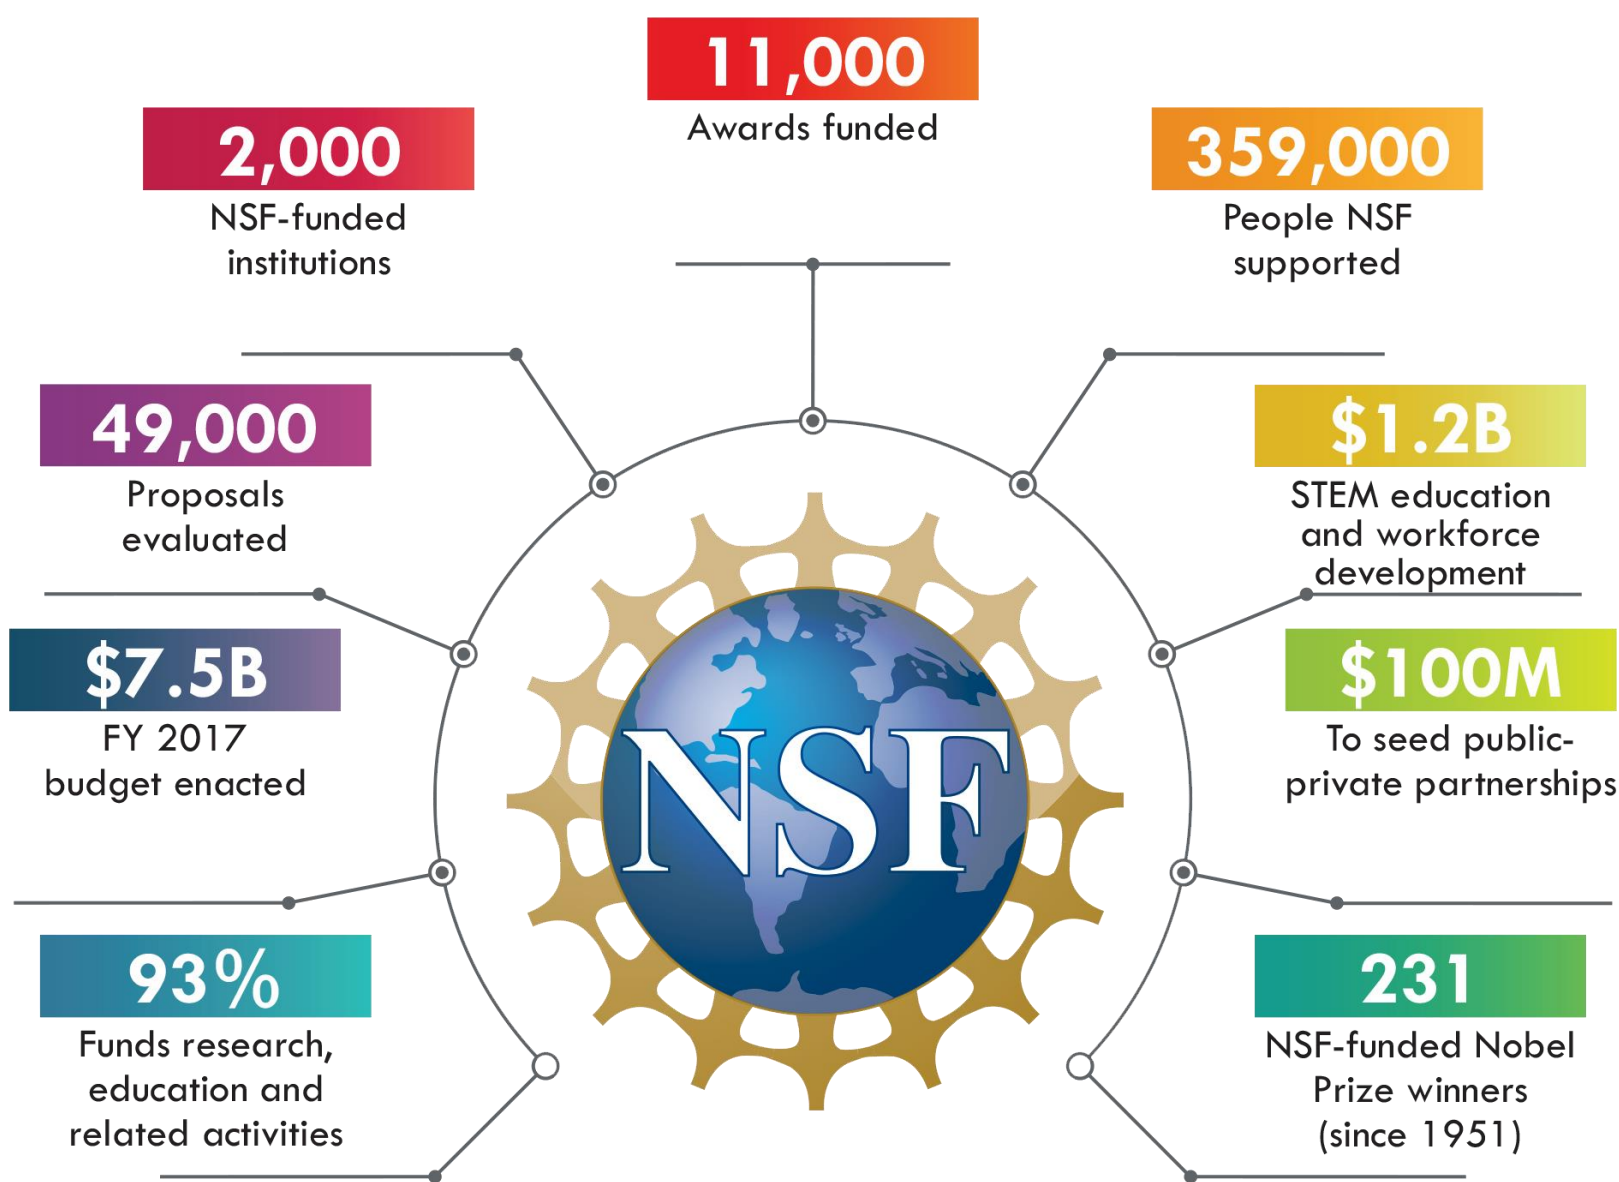

# What Makes NSF Unique

Funds broad fundamental research -- longer lead time for identifying results

Drives U.S. economy  
Enhances American security  
Advances knowledge  
to sustain U.S. global leadership.

Distributes 93% of its budget through the merit review process

Numbers shown are based on fiscal year 2017 activities.

NSF

FY2019

BUDGET REQUEST TO CONGRESS

Came out before FY 2018 budget deal was worked out, which contains \$300 million more this year. We'll see what happens for FY 2019.

# FY2018 Enacted NSF Budget and FY 2019 Request

NSF by Account	FY 2018 Enacted	FY 2019 Request	FY 2019 Request change over FY 2018 Enacted	
			Amount	Percent
Research & Related Activities	\$6,334.48	\$6,150.68	-\$183.80	-2.9%
Education & Human Resources	\$902.00	\$873.37	-\$28.63	-3.2%
Major Research Equipment & Facilities Construction	\$182.80	\$94.65	-\$88.15	-48.2%
Agency Operations & Award Management	\$328.51	\$333.63	\$5.12	1.6%
National Science Board	\$4.37	\$4.32	-\$0.05	-1.1%
Office of Inspector General	\$15.20	\$15.35	\$0.15	1.0%
<b>Total, NSF</b>	<b>\$7,767.36</b>	<b>\$7,472.00</b>	<b>-\$295.36</b>	<b>-3.8%</b>

Totals may not add due to rounding.

Radio astronomy reveals celestial wonders hidden from the human eye.

FULL SCREEN

Andrew Clegg, NSF

1 of 10

## What Lies Beyond?

Though many cosmic phenomena are visible to us, much of the universe is hidden from view, obscured by gas and dust. After the serendipitous discovery of radio waves coming from the Milky Way's center in the 1930s, scientists realized radio waves, which have a longer wavelength than visible light, could reveal many aspects of cosmic phenomena not visible in other wavelengths.

For more than 60 years, the National Science Foundation (NSF) has invested in state-of-the-art facilities to advance the field of radio astronomy, starting with the nation's first astronomical observatory—the National Radio Astronomy Observatory (NRAO). Today, NSF supports radio telescopes from West Virginia to the Chilean Andes.

The following images offer a virtual tour of some of those telescopes and their discoveries.

Pictured: The Karl G. Jansky Very Large Array in New Mexico.

# Computer & Information Science & Engineering (CISE)

**Jeremy Epstein**

Computer and Network Systems (CNS)

[jepstein@nsf.gov](mailto:jepstein@nsf.gov)

CNS Deputy Division Director

Research interests in security & privacy broadly, and in voting/elections in particular

Former lead program officer for Secure and Trustworthy Cyberspace

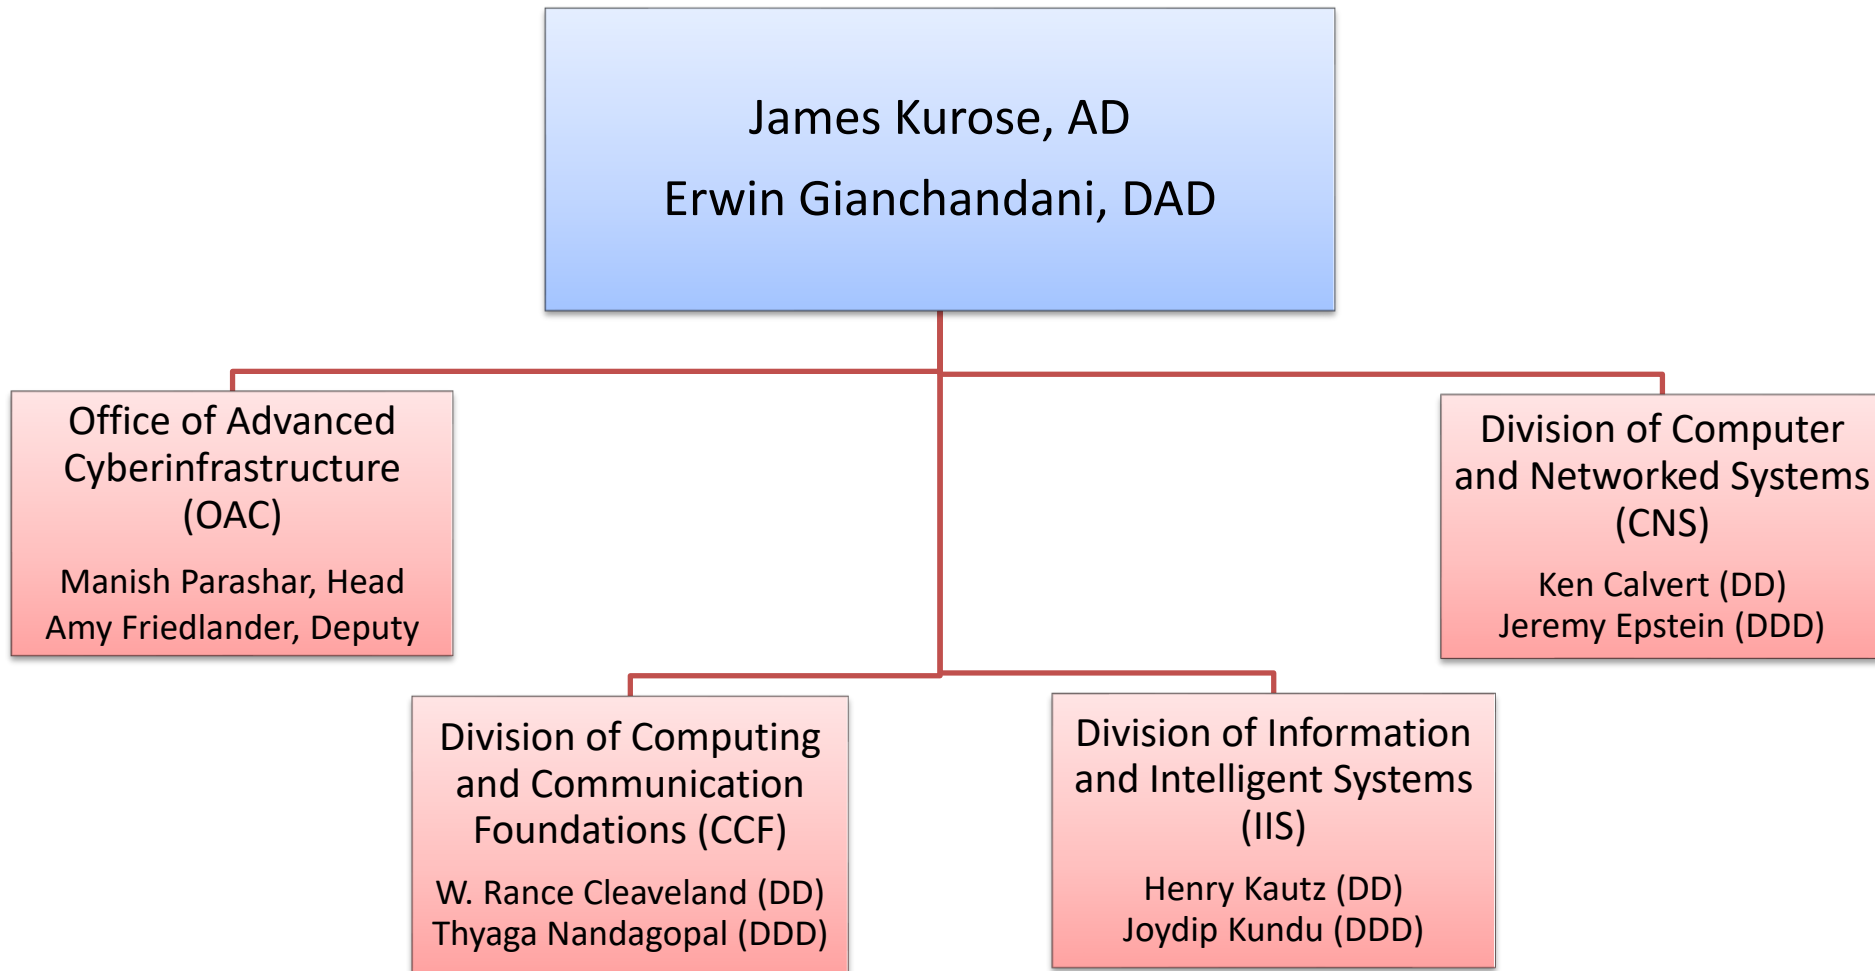

Fun fact:

One of the few NSF scientists without a PhD

Love bicycling and chocolate

# Computer & Information Science & Engineering (CISE)

# Computer & Information Science & Engineering (CISE)

## PRIORITIES

- **Core** research programs across all of computer science
- **Cross-cutting** programs that cross NSF directorates and programs:

BIG DATA, Collaborative Research in Computational Neuroscience, Cyber-Physical Systems, Enabling Quantum Leap, Future of Work at the Human-Technology Frontier, National Robotics Initiative, Secure and Trustworthy Cyberspace, Software Infrastructure for Sustained Innovation, Smart & Connected Health/ Communities

- **Education & Diversity:** CSforAll, Broadening Participation in Computing
- **Early Career Support:** CISE Research Initiation Initiative
- **Other: Research infrastructure, Technology transition & industry collaboration** (e.g., I-Corps, I/UCRC)

# NSF Directorates and Offices Education & Human Resources (EHR)

# Education & Human Resources (EHR)

**Robert L. Russell**

Division of Research on Learning (DRL)

[rrussel@nsf.edu](mailto:rrussel@nsf.edu)

Over 30 years of experience in STEM education spanning childrens' museums, science centers, community organizations, and media.

Joined NSF in 2012

Manages proposals concerned with informal, classroom and cyberlearning STEM education

Expertise designing and evaluating projects targeting underserved minorities, including Hispanics and African-Americans

# Directorate for Education and Human Resources (EHR)

07/19/2018

# EHR Investment Priorities

## STEM Learning and Learning Environments

- Build on cognitive and “non-cognitive” foundations in STEM
- Support research and the development of innovative tools, approaches and practices in formal and informal STEM learning contexts

## Broadening Participation and Institutional Capacity in STEM

- Promote accessibility, supports and success for underrepresented groups through high-quality STEM education

## STEM Workforce

- Build capacity and prepare a diverse STEM workforce
- Capitalize on novel advances in science and technology
- Address emerging global, social, and economic challenges and opportunities

# NSF Directorates and Offices Engineering (ENG)

# Engineering (ENG)

**Anthony Kuh**

Electrical, Communications and Cyber Systems (ECCS)

[akuh@nsf.gov](mailto:akuh@nsf.gov)

Started as a program director in January 2017

Held workshop on Real-Time Learning and Decision Making in Dynamical Systems which lead to a DCL on Engineered Systems.

Work on core EPCN / ECCS program + CPS, Smart and Connected Communities, INFEWS and Big Data

Member of two working groups of the 10 NSF Big Ideas:

Harnessing the Data Revolution (HDR)  
Human Technology Frontier (HTF)

# Engineering (ENG)

**Nora Savage**

Chemical, Bioengineering, Environmental and Transport Systems (CBET)

[nsavage@nsf.gov](mailto:nsavage@nsf.gov)

Served the environmental research community for over 20 years – federal and state

Served the environmental nano research community for 20 years

Published numerous articles, edited several books, and contributed chapters to several books

# Engineering (ENG)

## Prakash Balan

Innovation Industrial Partnerships (IIP)

[pbalan@nsf.gov](mailto:pbalan@nsf.gov)

NSF program management experience in programs catalyzing industry-university partnerships and collaborative research

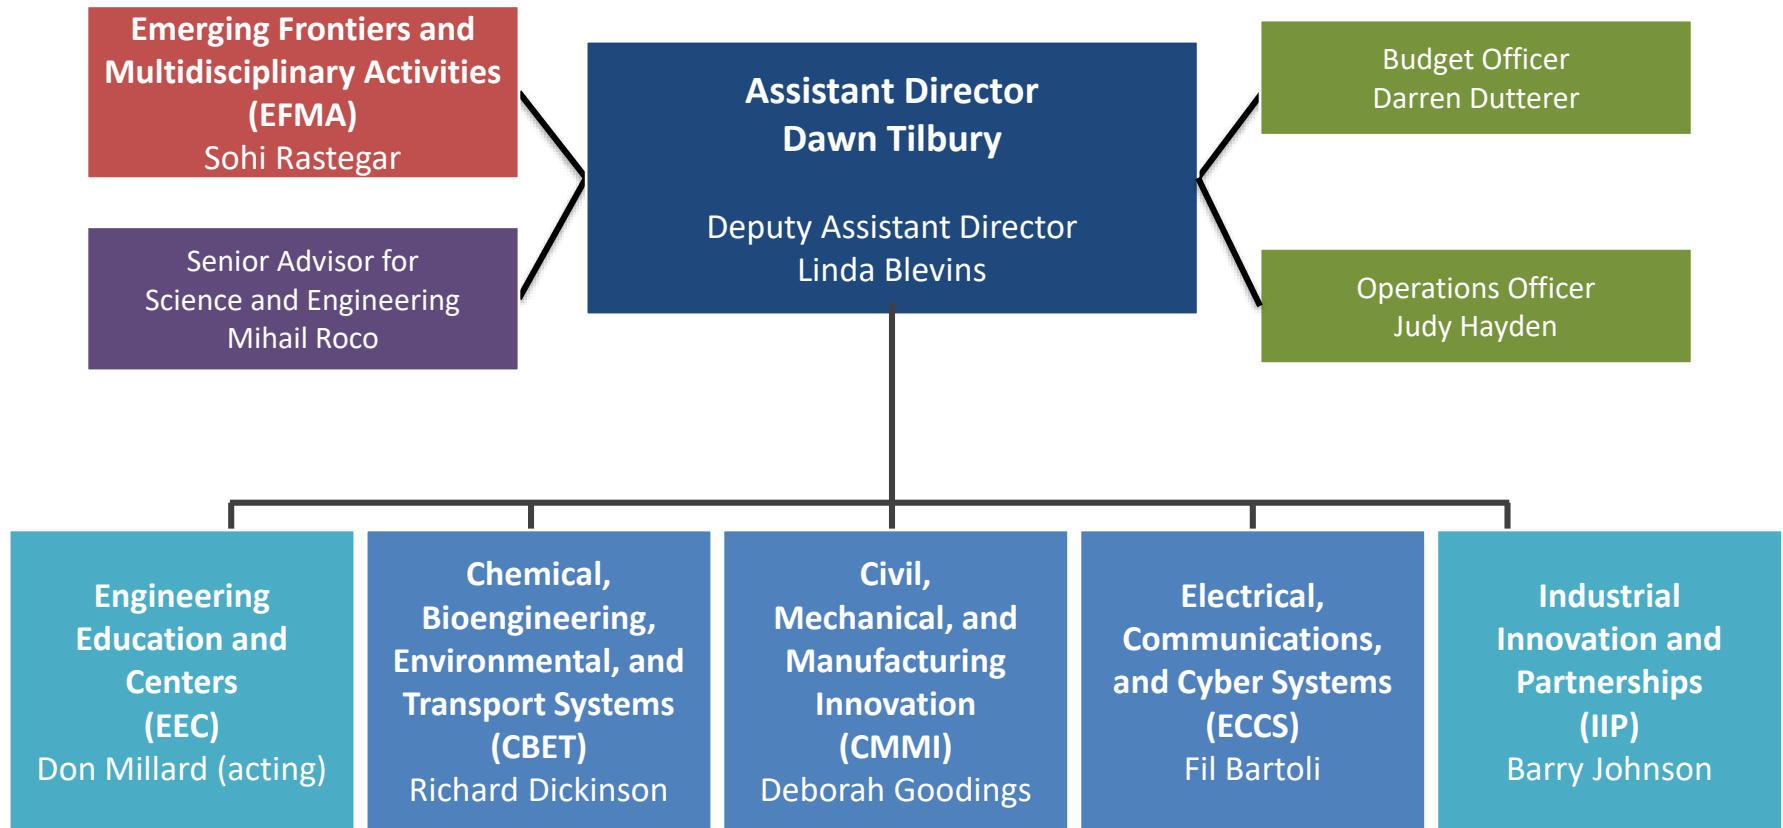

20+ years of leadership and innovation in large industry, small business and NSF

Chemical Engineer, Inventor and Entrepreneur

Patented innovations in energy efficient wastewater treatment technology currently installed in numerous large municipal treatment facilities nationwide and abroad

# Engineering (ENG)

[sortega@nsf.gov](mailto:sortega@nsf.gov)

Joined NSF in 1989: Manage West Europe, Mexico and Brazil portfolio- serves as liaison with Education and Human Resources Directorate (EHR)

Headed NSF Europe Office until April 2018

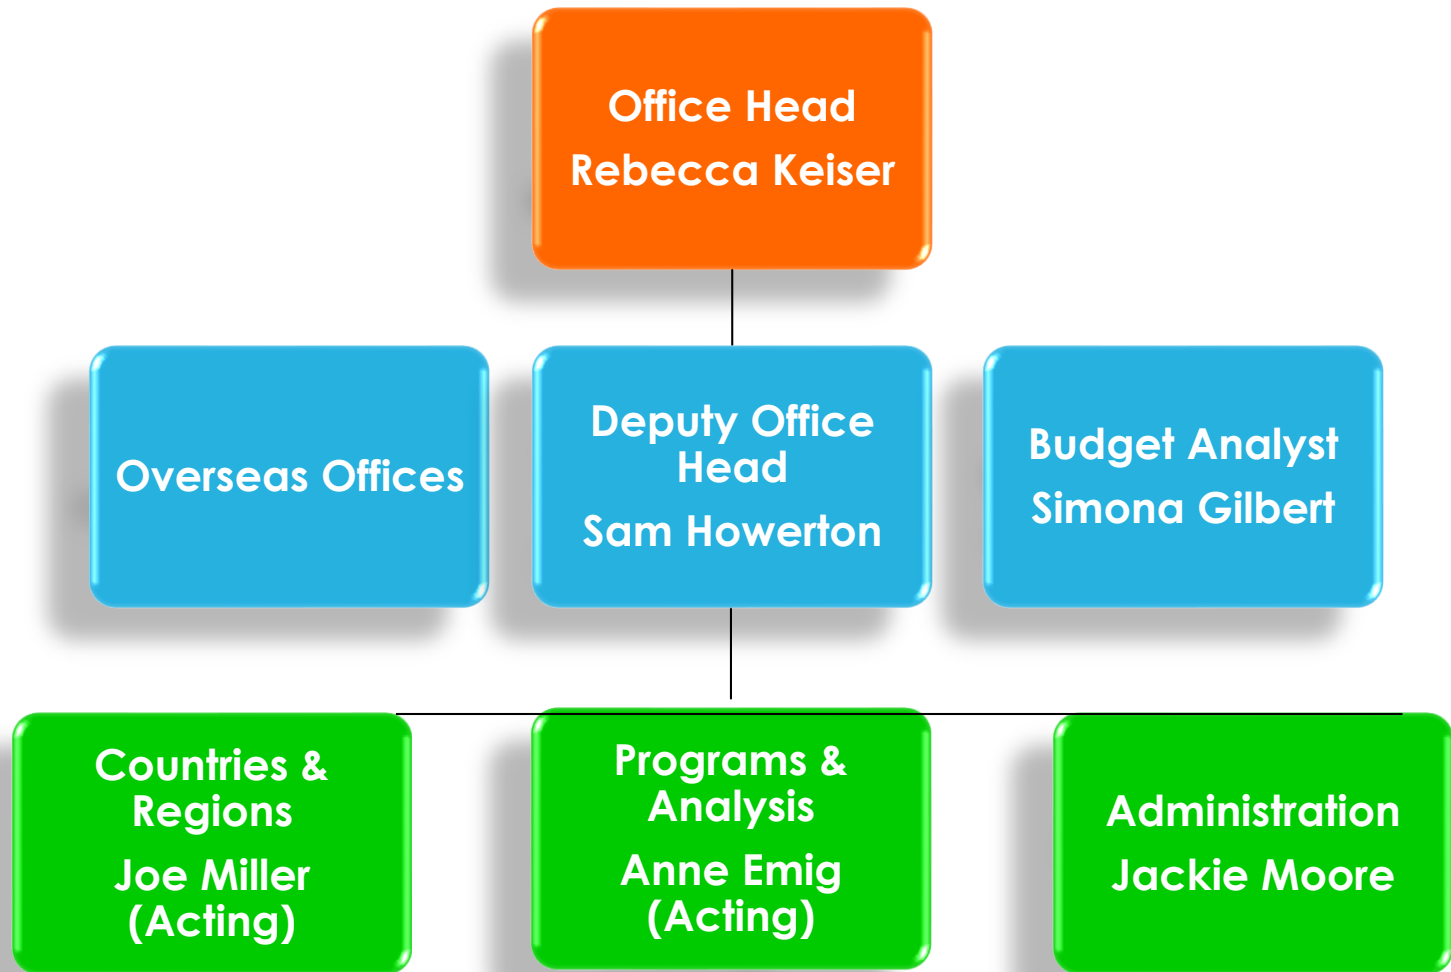

Spent three years on detail at UNM-LTER Network Office

Former Program Officer in Division of Graduate Education- DGE/EHR

Marine biologist, Private Pilot and Avid Traveler

# Office of International Science and Engineering

# Office of International Science & Engineering

## PRIORITIES

Advance the FRONTIERS of S&E via international collaboration

Prepare a GLOBALLY-ENGAGED U.S. S&E workforce

Develop GLOBAL KNOWLEDGE NETWORKS that link U.S. faculty and students to the world

Leverage RESOURCES, EXPERTISE, FACILITIES around the globe

# Budget, Finance & Award Management (BFA)

# Budget, Finance & Award Management (BFA)

**Jeremy Leffler**

Policy Office, Division of Institution & Award Support

[jleffler@nsf.gov](mailto:jleffler@nsf.gov)

Serves as outreach specialist for proposal & award policy

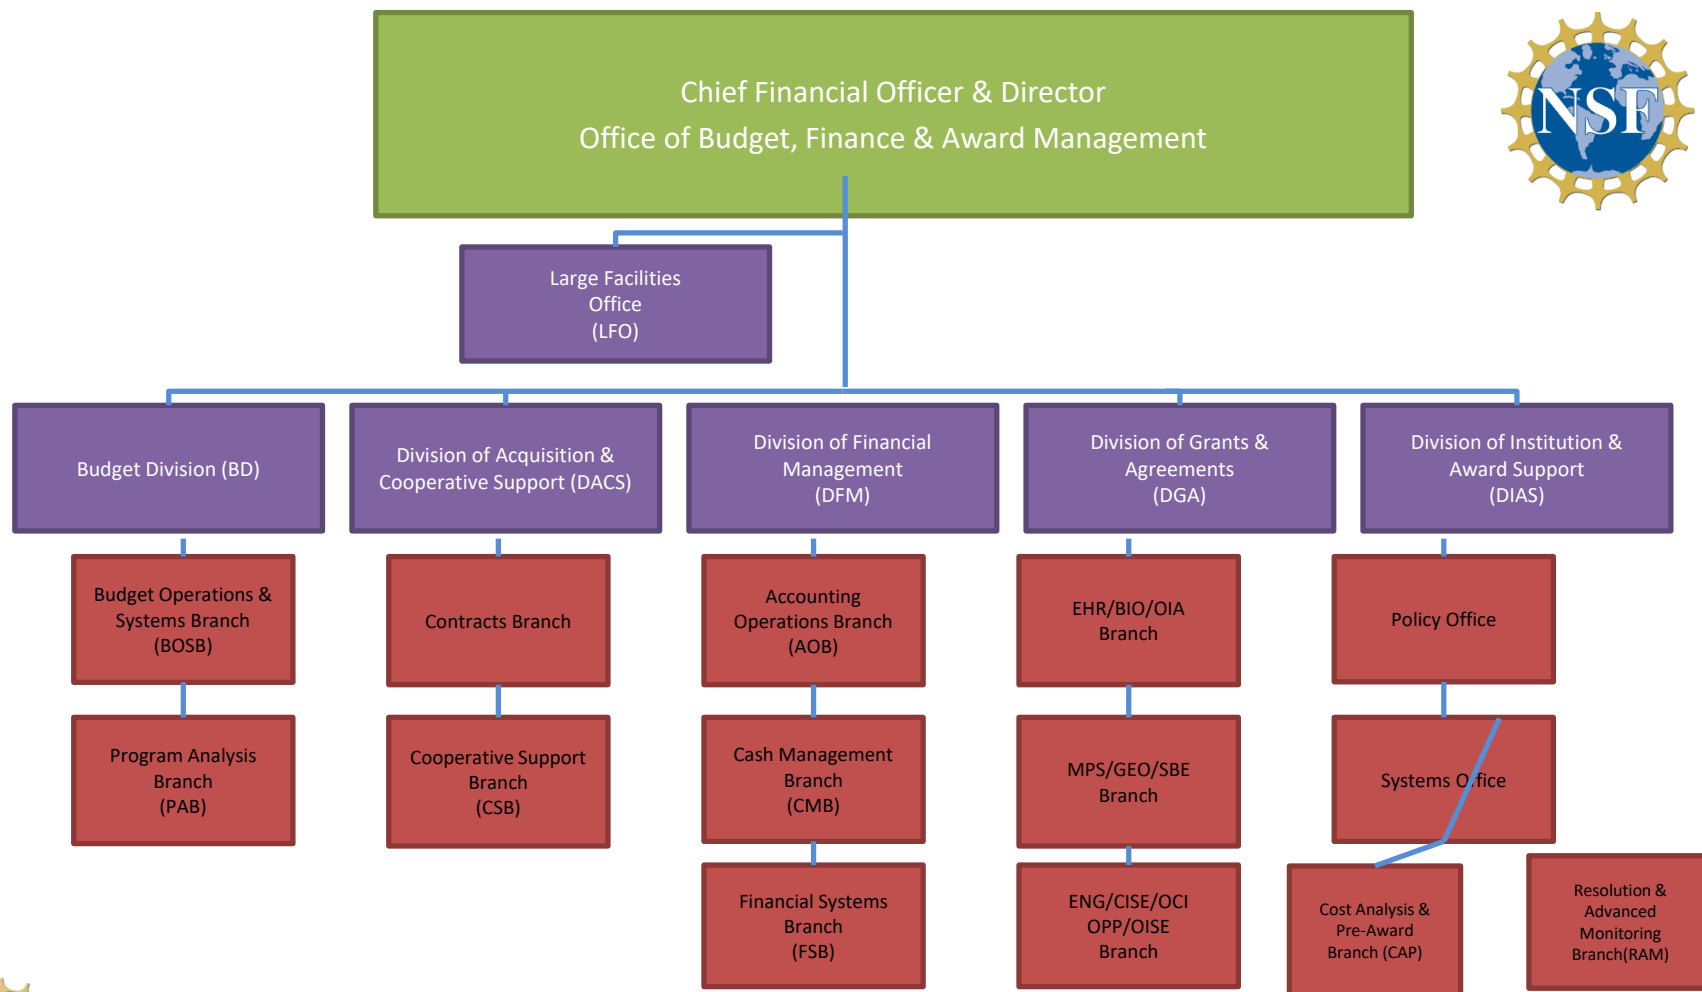

Communicates policies and procedures to the research community and NSF staff

Organizes bi-annual NSF Grants Conference

Plans S & E research and education programs for institutions that are historically underserved in the federal arena.

## BFA Organizational Chart

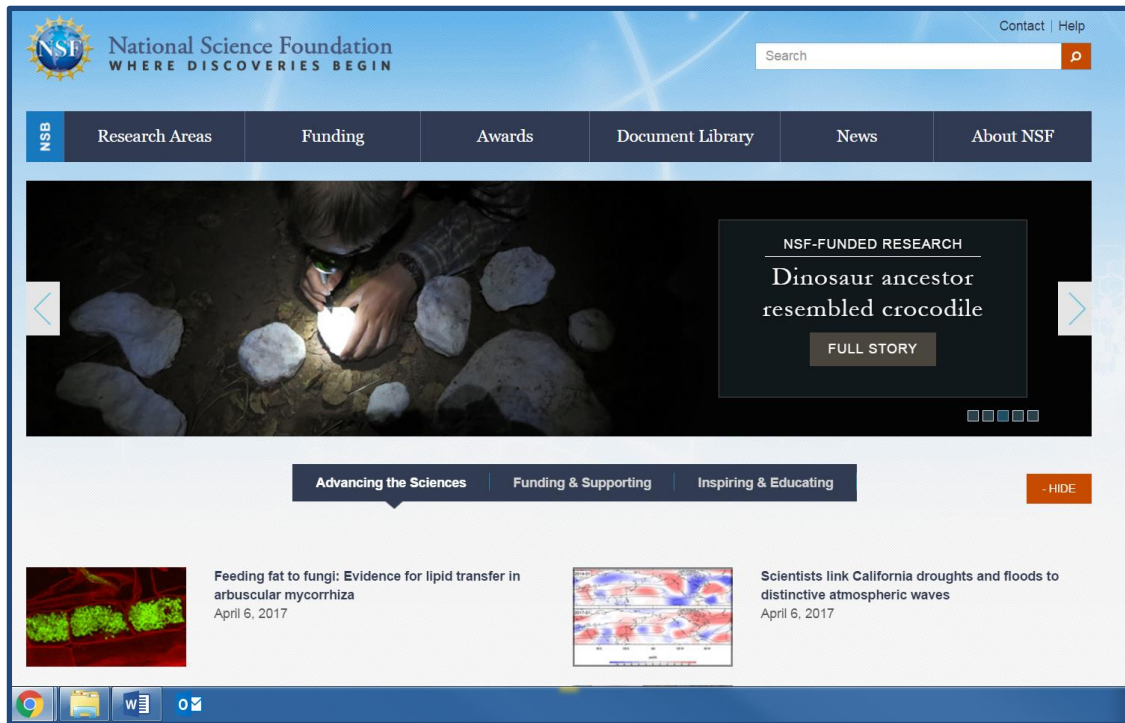

# Getting Started The Essentials

# www.NSF.gov

The screenshot shows the NSF.gov homepage with the following elements:

- Header:** NSF logo with the tagline "WHERE DISCOVERIES BEGIN", a search bar, and "Contact | Help" links.
- Navigation:** A dark blue bar with menu items: "NSF", "Research Areas", "Funding", "Awards", "Document Library", "News", and "About NSF".
- Main Content:** A large dark image of a person examining fossils with a flashlight. A text box reads "NSF-FUNDED RESEARCH: Dinosaur ancestor resembled crocodile" with a "FULL STORY" button.
- Secondary Content:** Three smaller article teasers with images and titles: "Feeding fat to fungi: Evidence for lipid transfer in arbuscular mycorrhiza", "Scientists link California droughts and floods to distinctive atmospheric waves", and "Harms of nighttime light exposure passed to offspring".
- Footer:** A taskbar with icons for Chrome, File Explorer, Word, and Outlook.

This section shows a social media follow interface:

- Article Teaser:** "Harms of nighttime light exposure passed to offspring" dated March 31, 2017.
- Follow Button:** A blue "FOLLOW" button is circled in red.
- Follow Us:** A section titled "FOLLOW US" with icons for email, Facebook, Twitter, LinkedIn, YouTube, RSS, and Tumblr.
- Text:** "See all NSF social media" with a right-pointing arrow.
- Twitter Post:** A tweet from "National Science Fdn @NSF" is partially visible.
- Section Header:** "NSF Funding & Research Community" with a sub-section for "SPECIAL NOTICES".

# Navigating: Funding at www.NSF.gov

The image shows a screenshot of the National Science Foundation (NSF) website. The top navigation bar includes the NSF logo, the text "National Science Foundation WHERE DISCOVERIES BEGIN", a search bar, and links for "Contact" and "Help". Below this is a secondary navigation bar with tabs for "Research Areas", "Funding", "Awards", "Document Library", "News", and "About NSF". The "Funding" tab is highlighted with a red circle, and its dropdown menu is open, listing various funding-related links. To the right of the dropdown menu, there is a "RELATED LINKS" section with links to "Proposal and Award Policies and Procedures Guide (PAPPG)", "Research.gov", and "FastLane". Below that is a "FUNDING OPPORTUNITIES FOR" section with links for "Graduate Students", "K-12 Educators", "Postdoctoral Fellows", "Undergraduate Students", and "Small Business". The main content area features a large banner with the text "FUNDED RESEARCH" and "s with material in early Earth", and a "FULL STORY" button. Below the banner are two news items: "Feeding fat to fungi: Evidence for lipid transfer in arbuscular mycorrhiza" dated April 6, 2017, and "Scientists link California droughts and floods to distinctive atmospheric waves" dated April 6, 2017.

# What is the Proposal & Award Policies & Procedures Guide?

The Proposal & Award Policies & Procedures Guide (PAPPG) contains documents relating to NSF's proposal and award process. It has been designed for use by both our customer community and NSF staff and consists of two parts.

Part I is NSF's proposal preparation and submission guidelines

Part II is NSF's award and administration guidelines

# What is the Proposal & Award Policies & Procedures Guide?

- Provides guidance for preparation and submission of proposals to NSF
- Describes process – and criteria – by which proposals will be reviewed
- Outlines reasons why a proposal may not be accepted or returned without review
- Describes process for withdrawals, returns, and declinations
- Includes policies to guide, manage, and monitor the award and administration of grants and cooperative agreements

# Types of Proposals

- Research
- RAPID
- EAGER
- RAISE
- GOALI
- Ideas Lab
- FASED
- Conference
- Equipment
- Travel
- Facility/Center
- Fellowship

**PROGRAM GUIDELINES**

Apply to PD 10-1264 as follows: ←

For full proposals submitted via FastLane: standard [Grant Proposal Guide](#) proposal preparation guidelines apply.  
For full proposals submitted via Grants.gov: the *NSF Grants.gov Application Guide; A Guide for the Preparation and Submission of NSF Applications via Grants.gov Guidelines* applies. (Note: The *NSF Grants.gov Application Guide* is available on the Grants.gov website and on the NSF website at: [http://www.nsf.gov/publications/pub\\_summ.jsp?ods\\_key=grantsgovguide](http://www.nsf.gov/publications/pub_summ.jsp?ods_key=grantsgovguide))

**Important Information for Proposers**

A revised version of the *NSF Proposal & Award Policies & Procedures Guide* (PAPPG) (NSF 15-1), is effective for proposals submitted, or due, on or after December 26, 2014. The PAPPG is consistent with, and, implements the new Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards (Uniform Guidance) (2 CFR § 200). Please be advised that the guidelines contained in NSF 15-1 apply to proposals submitted in response to this funding opportunity.

**DUE DATES** ←

Full Proposal Target Date: October 9, 2015  
Second Friday of October  
Second Friday in October, Annually Thereafter

Research proposals (as opposed to conference proposals) are expected to be submitted by the target date. An extension may be granted under unusual extenuating circumstances, provided that approval is obtained from the cognizant Program Director prior to the target date.

**SYNOPSIS** ←

The Algebra and Number Theory program supports research in algebra, algebraic and arithmetic geometry, number theory, and representation theory.

**Conferences**

Principal Investigators should carefully read the program solicitation "Conferences and Workshops in the Mathematical Sciences" (link below) to obtain important information regarding the substance of proposals for conferences, workshops, summer/winter schools, and similar activities.

For conference proposals with budgets not exceeding \$50,000, which in accordance with NSF policy can be reviewed internally at NSF, the following target dates are in effect: For an event that will take place at some time prior to October 1 during a given year, the proposal should be submitted in October of the previous year. For an event that will occur in the period October 1 through December 31 of a given year, the proposal should be submitted in May of that year. A conference proposal with a budget request exceeding \$50,000 should be submitted roughly seven months before the event is scheduled to take place, in order to allow time for external review.

# NSF Proposal & Award Process Timeline

# Types of Proposal Submissions

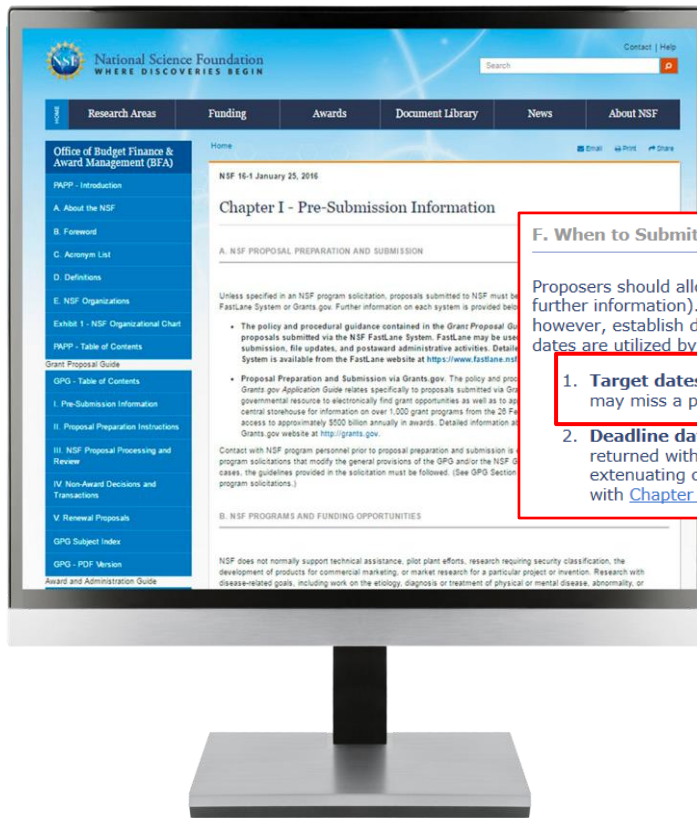

## NO DEADLINES

Proposals may be submitted at any time

# Types of Proposal Submissions

## TARGET DATES

Talk to the Program Office if you think you might miss the date

### F. When to Submit Proposals

Proposers should allow adequate time for processing of proposals (see [Chapter I.H](#) for further information). Many NSF programs accept proposals at any time. Other programs, however, establish due dates for submission of proposals. The following types of due dates are utilized by NSF:

1. **Target dates:** dates after which proposals will still be accepted, although they may miss a particular panel or committee meeting.
2. **Deadline dates:** dates after which proposals will not be accepted or will be returned without review by NSF. The deadline date will be waived only in extenuating circumstances. Such a deviation only may be authorized in accordance with [Chapter II.A](#).

# Types of Proposal Submissions

## Deadline Dates

Proposals will not be accepted after this date and time (5 pm submitter's local time)

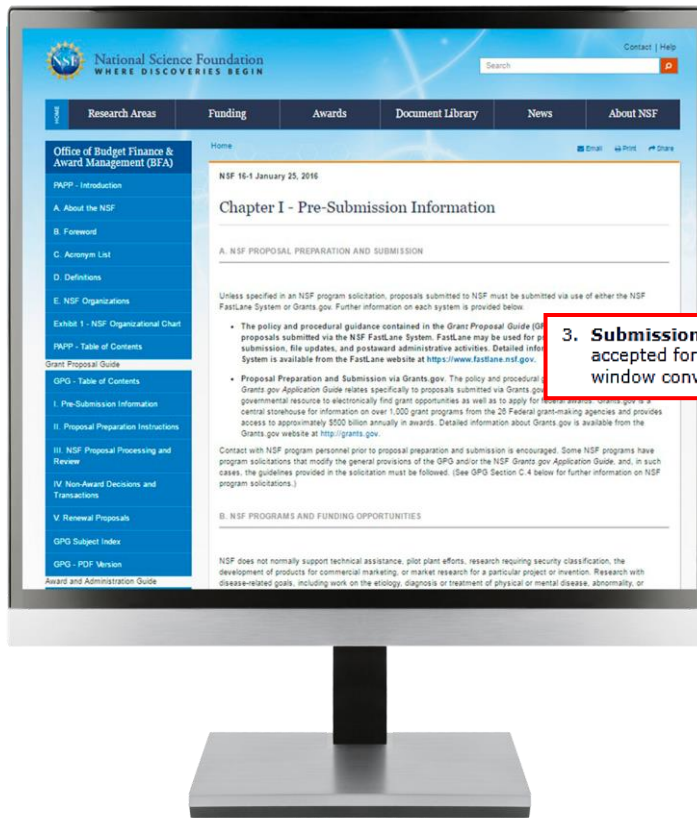

### F. When to Submit Proposals

Proposers should allow adequate time for NSF review and processing of proposals (see [GPG Chapter I.H](#) for further information). Many NSF programs accept proposals at any time. Other programs, however, establish due dates for submission of proposals. The following types of due dates are utilized by NSF:

1. **Target dates:** dates after which proposals will still be accepted, although they may miss a particular panel or committee meeting.
2. **Deadline dates:** dates after which proposals be returned without review by NSF. The deadline date will be waived only in extenuating circumstances. Such a deviation only may be authorized in accordance with [GPG Chapter II.A](#).

# Types of Proposal Submissions

## SUBMISSION WINDOWS

Proposals will not be accepted after this date and time (5 p.m. submitter's local time)

**3. Submission windows:** designated periods of time during which proposals will be accepted for review by NSF. It is NSF's policy that the end date of a submission window converts to, and is subject to, the same policies as a deadline date.

# Types of Proposal Submissions

## LETTERS OF INTENT

Enables better management of reviewers and panelists

### 1. Letters of Intent

Some NSF program solicitations require or request submission of a letter of intent (LOI) in advance of submission of a full proposal. An LOI is not a binding document. The predominant reason for its use is to help NSF program staff gauge the size and range of the competition, enabling earlier selection and better management of reviewers and panelists. In addition, the information contained in an LOI is used to help avoid potential conflicts of interest in the review process.

An LOI normally contains the Principal Investigator's (PI's) and co-PI's names, a proposed title, a list of possible participating organizations (if applicable), and a synopsis that describes the work in sufficient detail to permit an appropriate selection of reviewers. An LOI is not externally evaluated or used to decide on funding. The requirement to submit an LOI will be identified in the program solicitation, and such letters are submitted electronically to NSF. Failure to submit a required LOI identified in a program solicitation will result in a full proposal not being accepted or returned without review.

# Types of Proposal Submissions

## PRELIMINARY PROPOSALS

Sometimes required, sometimes optional

### 2. Preliminary Proposals

Some NSF program solicitations require or request submission of a preliminary proposal in advance of submission of a full proposal. The three predominant reasons for requiring submission of a preliminary proposal are to:

- reduce the proposers' unnecessary effort in proposal preparation when the chance of success is very small. This is particularly true of exploratory initiatives when the community senses that a major new direction is being identified, or competitions that will result in a small number of awards;
- increase the overall quality of the full submission; and
- assist NSF program staff in managing the review process and in the selection of reviewers.

# Questions on Funding Opportunities?

Contact your  
NSF Program Officer

Work with your  
organization's  
sponsored  
projects office

Ask Early, Ask Often  
[policy@nsf.gov](mailto:policy@nsf.gov)

# Things to Consider Before Writing a Proposal...

# Five Key Elements

1. Great idea
2. Fit with current research expertise and career development plans
3. Ability to devise a strategy including benchmarks, timelines, and metrics
4. Adequate resources to accomplish your project
5. Assessment Plan

# Developing your Proposal

## Key Questions for Prospective Investigators

- What has already been done?
- Develop hunch or hypotheses for forward progress
- Obtain preliminary data
- What do you intend to do?
- Why is the work important or unique?

# Proposal Development Strategies:

## What Do You Need Besides \$ ???

- Prepare to do the project
  - How are you going to do the work?
  - Realistically assess needs
  - Do you have the right team?
  - Determine available resources
  - Present to colleagues/mentors/students
- Determine possible funding sources  
(NSF may not be the right or the only one)

# Proposal Development Strategies:

What details should you glean from the solicitation?

- Overall scope and mission
- Instructions (deviations from the PAPPG)
- How your proposed project fits with the solicitation
- Review procedures and criteria
- Deadlines

# Proposal Development Strategies:

## Who Should You Talk To?

### NSF Program Officer

Your proposed project

Clarifications on specific program requirements/limitations

Current program patterns

### Your Organization's Sponsored Projects Office

- University guidelines for applications
- Institutional Review Board "IRB" Approvals
  - e.g. institutional Animal Care and Use Committee (IACUC) approvals

# Sections of a Proposal ...

# NSF PROPOSAL INGREDIENTS

- Cover Sheet
- Project Summary (1 page)
- Project Description (15 pages)
- References Cited
- Biographical Sketches (for all senior personnel)
- Budget
- Budget Justification (5 pages)
- Current and Pending Support
- Facilities, Equipment, and Other Resources
- Post-doctoral mentoring plan (if applicable)
- Data management plan

# Parts of an NSF Proposal

## Cover Sheet

Many of the boxes on the cover sheet are electronically prefilled as part of the FastLane login process.

# Parts of an NSF Proposal

## Project Summary Requirements:

Overview

Statement on Intellectual Merit

Statement of Broader Impacts

Special characters (e.g., formulas) may be uploaded as a PDF

## Project Description Addresses:

What you want to do

Why you want to do it

How you plan to do it

How you measure success

What are the benefits

Results from prior NSF support

# Parts of an NSF Proposal

The Project Description must contain separate sections labeled *Intellectual Merit* and *Broader Impacts*

# Budgetary Guidelines

## Amounts should be:

- **Realistic and reasonable**
- **Well-justified and should establish need**
- **Consistent w/program guidelines in solicitation and Proposal & Award Policies & Procedures Guide (PAPPG)**

## Eligible costs consist of:

- **Personnel**
- **Equipment**
- **Travel**
- **Participant support**
- **Other** (e.g., subawards, consultant and computer services, publications costs)
- **Indirect costs** (as appropriate)

# NSF Cost Sharing Policy

Inclusion of *voluntary committed* cost sharing is prohibited in the budget of solicited & unsolicited proposals.

Organizations may, at their own discretion, continue to contribute *voluntary uncommitted* cost sharing to NSF-sponsored projects as part of the section for Facilities, Equipment, and Other Resources.

# Sections of an NSF Proposal

## Facilities, Equipment, and Other Resources

Used to assess the adequacy of the organizational resources available to perform the effort proposed. Should not contain quantifiable financial information.

## Current and Pending Support

This section of the proposal requires reporting on all current and pending support for ongoing projects and proposals from any funding source.

# Special Information and Supplementary Documentation

- Letters of collaboration (no letters of support)
- Postdoctoral mentoring plans
- Data management plans
- You should alert NSF officials to unusual circumstances that require special handling (i.e. proprietary information)
- Solicitations may specify what is and is not allowed to be submitted

# Mentoring for Postdoctoral Researchers

- Explicit description of the mentoring activities
- Must include a mentoring plan as a supplementary document (maximum one-page)
- For collaborative proposals, lead organization must submit a single mentoring plan for all postdoctoral researchers supported under the entire project.

# Data Management Plan Requirements

- All proposals are required to include, as a supplementary doc, a Data Management Plan of up to two pages.
- Plan should describe how the proposal will conform to NSF policy on dissemination and sharing of research results.
- A valid Data Management Plan may include only the statement that no detailed plan is needed, as long as a clear justification is provided.
- Plan will be reviewed as part of the Intellectual Merit and/or Broader Impacts of the proposal.

# Single Copy Documents

Some proposal documents are for “NSF Use Only” and are not provided to reviewers

- Authorization to deviate from proposal preparation requirements
- List of suggested reviewers to include or not to include
- Proprietary or privileged information
- Proposal certifications
- Information about collaborators and other affiliations

# Questions?

# The Merit Review Process

# NSF's Proposal & Award Process Timeline

## PHASE I

PROPOSAL  
PREPARATION  
AND SUBMISSION  
90 DAYS

## PHASE II

PROPOSAL  
REVIEW AND  
PROCESSING  
6 MONTHS

## PHASE III

AWARD  
PROCESSING  
30 DAYS

[https://www.nsf.gov/bfa/dias/policy/merit\\_review/](https://www.nsf.gov/bfa/dias/policy/merit_review/)

# When Preparing Proposals

- Read the funding opportunity; ask a Program Officer for clarifications if needed
- Address all the proposal review criteria
- Understand the NSF merit review process
- Avoid omissions and mistakes
- Check your proposal to verify that it is complete!
- Double Check that the proposal NSF receives is the one you intended to send

# Proposal & Award Policies and Procedures Guide (PAPPG)

# NSF Merit Review Criteria:

- 1. Intellectual Merit –**  
**The potential to advance knowledge**
- 2. Broader Impact –**  
**The potential to benefit society and contribute to the achievement of specific, desired societal outcomes**

# NSF Review Criteria: Review Elements

- The following elements should be considered in the review for both criteria:
- What is the potential for the proposed activity to:
  - *advance knowledge* and understanding within its own field or across different fields (**Intellectual Merit**); and
  - *benefit society* or advance desired societal outcomes (**Broader Impacts**)?
- To what extent do the proposed activities suggest and explore creative, original, or potentially transformative concepts?
- Is the plan for carrying out the proposed activities well-reasoned, well-organized, and based on a sound rationale? Does the plan incorporate a mechanism to assess success?
- How well qualified is the individual, team, or institution to conduct the proposed activities?
- Are there adequate resources available to the PI (either at the home institution or through collaborations) to carry out the proposed activities?

# Over 1,300 proposals were RWR in FY 2016

## 5 most common reasons why

1. Not responsive to the PAPPG or program announcement/solicitation (nearly half)
2. Does not meet an announced proposal deadline date and time
3. Duplicative or substantially similar to a proposal already under consideration
4. Not substantively revised from a proposal that was previously reviewed and declined
5. Duplicates another proposal that was already awarded

# NSF's Proposal & Award Process Timeline

## PHASE I

PROPOSAL  
PREPARATION  
AND SUBMISSION  
90 DAYS

## PHASE II

PROPOSAL  
REVIEW AND  
PROCESSING  
6 MONTHS

## PHASE III

AWARD  
PROCESSING  
30 DAYS

[https://www.nsf.gov/bfa/dias/policy/merit\\_review/](https://www.nsf.gov/bfa/dias/policy/merit_review/)

# Types of Reviews

- Ad Hoc (individual reviewer)
- Panel (gathered reviewers)
- Combination
- Internal
  - Reviewed by NSF Program Officers (special cases)

# How are Reviewers Selected?

- Three or more external reviewers per proposal
- No conflicts of interest
- Types of reviewers recruited: depth and breadth
- Sources of reviewers
  - Former reviewers
  - Program Officer's knowledge of the research area
  - References listed in proposal
  - Recent professional society program
  - S&E journal articles related to the proposal
  - Reviewer recommendations included in proposal

# How Do I Become a Reviewer?

**Contact the NSF Program Officer(s) of the program(s) that fit your expertise**

- Introduce yourself as a strong potential reviewer based on your research experience
- Offer to send a 2-page CV with current contact information

# What is the Role of the Reviewer?

## **Review all proposal material and consider**

- The two NSF merit review criteria and any program specific criteria
- Adequacy of the proposed project plan- including the budget, resources, and timeline
- Priorities of the scientific field and of the NSF program
- Potential risks and benefits of the project

## **Make independent written comments on the quality of the proposal content**

# What is the Role of the Review Panel?

- Discuss the merits of the proposal with the other panelists
- Write a summary based on that discussion
- Discern relative merit of all proposals considered by panel

# Managing Conflicts of Interest in the Review Process

- The primary purpose is to remove or limit the influence of ties to an applicant institution or investigator that could affect reviewer advice.
- The secondary purpose is to preserve the trust of the scientific community, Congress, and the general public in the integrity, effectiveness, and evenhandedness of NSF's merit review process.

# NSF's Proposal & Award Process Timeline

## PHASE I

PROPOSAL  
PREPARATION  
AND SUBMISSION

6 MONTHS

## PHASE III

AWARD  
PROCESSING  
30 DAYS

[https://www.nsf.gov/bfa/dias/policy/merit\\_review/](https://www.nsf.gov/bfa/dias/policy/merit_review/)

# Funding Decisions

## Reviews are Advisory to NSF

**The merit review process provides:**

- Review of the proposal and a recommendation on funding
- Feedback (strengths and weaknesses) to the proposers

**NSF Program Officers make funding recommendations guided by program goals and portfolio considerations**

**NSF Division Directors either concur or reject the Program Officers' funding recommendations**

# Feedback from Merit Review

- Reviewer ratings (such as: E, V, G, F, P)
- Analysis of how well proposal addresses both review criteria: Intellectual Merit and Broader Impacts
- Proposal strengths and weaknesses
- Reasons for decline (if applicable)

**If you have any questions, contact the cognizant Program Officer**

# Examples of Reasons for Declines

- The proposal was not considered to be competitive based on the merit review criteria and the program office concurred.
- The proposal had flaws or issues identified by the program officer.
- The program funds were not adequate to fund all competitive proposals.

# Revisions and Resubmissions

## Points to consider:

- Do the reviewers and the NSF Program Officer identify significant strengths in your proposal?
- Can you address the weaknesses that reviewers and the Program Officer identified?
- Are there other ways you or your colleagues think you can strengthen a resubmission?

**Again, if you have questions, contact the cognizant Program Officer.**

# Faculty Early Career Development Program “CAREER”

[www.nsf.gov/career](http://www.nsf.gov/career)

# **CAREER Awards**

## **NSF 17-537**

### **Future Due Dates:**

<b>Third Wed</b>	<b>BIO, CISE, EHR</b>	<b>July 17, 2019</b>
<b>Third Thursday</b>	<b>ENG</b>	<b>July 18, 2019</b>
<b>Third Friday</b>	<b>GEO, MPS, SBE</b>	<b>July 19, 2019</b>

**Future Years: Third Wednesday, Thursday, Friday of July**

[www.nsf.gov/career](http://www.nsf.gov/career)

# CAREER Awards

Foundation wide

Supports junior faculty/new investigators

Research and education integration

PECASE

*(Presidential Early Career Award for Scientists and Engineers)*

eligibility

# CAREER Awards

Stable support for 5 years

Minimum award

\$500K in BIO, ENG, Office of Polar Activities

\$400K in other directorates

No official maximum, but subject to program's resources (speak with your Program Officer)

# An eligible institution must be:

An academic institution in the U.S., its territories or possessions, and the Commonwealth of Puerto Rico that award degrees in fields supported by NSF.

# An eligible institution may also be:

Non-profit, non-degree-granting (e.g. a museum, observatory or lab) if the eligibility requirements of the PI are satisfied.

NSF encourages proposals from different institutional types, including minority serving and undergraduate institutions

# CAREER varies across NSF

Number of submitted CAREER proposals

Review and Funding methods

Other Proposals with which CAREERs compete

Award Size

NSF CAREER Coordinating Committee  
Sets NSF-wide goals

Talk to Division Contact(s) for more information  
(<http://www.nsf.gov/crssprgm/career/contacts.jsp>)

# CAREER Proposals

Contact program manager liaison\* and ask about:

Expectations for scope of research and education

Assessment of 2-page departmental letter

Funding rate trend for regular proposals in program of interest

<http://www.nsf.gov/crssprgm/career/contacts.jsp>

# Are CAREER awards right for you?

Yes, if:

Your proposed research is innovative, ambitious and within NSF's the purview of research and education supported

You have support from your department/  
organization, mentors.

You are at the right stage of your career.

# CAREER Personnel and Budgets

Senior Personnel  
(Consultants,  
subawards,  
collaborators)

Academic year  
buyouts for teaching  
intensive institutions

# CAREER Departmental 2 Page Letter

- Statement of PI CAREER program eligibility
- Support for PI's proposed research and education activities
- Description of how the PIs career goals and responsibilities mesh with that of the organization and department
- Commitment to support professional development and mentoring of the PI
- NOT a letter of recommendation or endorsement of the PI or the research project

# CAREER Awards Urban Myths

“You cannot apply because you have another NSF award. . .”

“It is an entry program, so you must first apply to CAREER. . .”

“I need to see a successful proposal to write a successful proposal. . .”

“You have no chance, if you are not from a research intensive institution.. .”

“CAREER proposals are more portable than other NSF funding.”

“The education component does not matter. . .”

“I read on the web that to succeed, I have to....”

# Traits of a Successful CAREER Proposal

High quality -- This is a highly competitive program!

Matches disciplinary program expectations

Includes an appropriate scope of activities for a 5-year plan, not one's whole life!

Goes outside the education box of regular research proposals in the field

Strikes a balance between doable research activities and more risky pursuits

# The Central INFEWS Competition

**Requires attention to food, energy and water systems**

**Requires involvement from disciplines supported by 3 directorates**

**Requires a systems framework**

**Proposals go to one of three tracks:**

Modelling

Innovative Systems Solutions

Research Coordination Networks

**Maximum funding: \$2.5 M (Tracks 1,2); \$750 K (Track 3)**

**Solicitation [nsf18545](https://www.nsf.gov/awardsearch/showAward?AWD_ID=18545)**

**Deadline: Sept. 26, 2018**

# Broadening Participation

**NSF INCLUDES**

**ADVANCE**

**HBCU-UP, EiR**

**TCUP**

# NSF “INCLUDES”

Inclusion across the  
Nation of  
Communities of  
Learners of  
Underrepresented  
Discoverers in  
Engineering and  
Science

# NSF INCLUDES

**\*Collaborative Infrastructure**

**\*Networked-relationships**

**\*Talent from all sectors \*STEM workforce**

**\*Spur a national conversation for “bold visions”**

- **Launch Pilots: planning for partners to share goals and purposes.**
- **Alliances: leverage pilots adding new partners.**
- **Backbone organizations: provide increased communications, interoperability, coordination, support and accountability for the Network of Alliances.**
- **NSF 18-529**

**Deadline: April 2, 2019**

# ADVANCE: Increasing the Participation and Advancement of Women in Academic Science and Engineering Careers

## Goals:

Strategies to undertake organizational change to address gender diversity issues in STEM

Systemic approaches to increase the representation and advancement of women in academic STEM careers.

Contribute to and inform the general knowledge base on gender equity in the academic STEM disciplines.

# **ADVANCE – COMPONENTS**

## **NSF 16-594**

**COMPETITION WILL RUN EVERY OTHER YEAR**  
**INSTITUTIONAL TRANSFORMATION**

Preliminary Proposals – April 2019  
Full Proposals – January 2020

### **ADAPTION**

Letter of Intent – August 2019  
Full proposal – September 2019

### **PARTNERSHIPS**

Letter of Intent – December 2018  
Full proposal – January 2020

# Historically Black Colleges and Universities Undergraduate Program

## HBCU-UP

# NSF organizations participating in EiR:

**BIO CISE ENG GEO MPS SBE OIA**

## **Types of Awards:**

Collaborative projects of up to \$1,000,000 to build and support the development of research capacity at HBCUs.

Research projects of up to \$500,000 to support research by individual PIs.

# Tribal Colleges and Universities Program TCUP

**Supports STEM capacity-building  
and instructional improvement in:**

**Tribal colleges and universities  
Alaska Native-serving Native  
Hawaiian-serving**

**Institutions of higher education  
(IHEs)**

# TCUP supports:

Curriculum

Undergraduate Research

Student Stipends

Equipment

Facilities

Travel and...

# TCUP – NSF [18-546](#)

## **Transformative Capacity Building**

ICE-TI , TSIP, TEA Centers, Pre-TI

## **Multiple Institution Collaborations**

PAGE, PADLE

## **Individual Investigator Studies**

SGR, SEA-PHAGES in TCUs

# Fellowships and Opportunities

**GRFP**  
**GRIP**  
**INTERN**  
**PRFs**

# Graduate Research Fellowship Program

## GRFP Goals

- To select, recognize, and financially support individuals who have demonstrated the potential to be high achieving scientists and engineers, early in their careers.
- To broaden participation in science and engineering of underrepresented groups, including women, minorities, persons with disabilities and veterans.

# GRFP Unique Features

- **Fellowship:** Awarded to individual
- **Flexible:** Choice of project, advisor & graduate program
- **Unrestrictive:** No service requirement afterward
- **Portable:** Can be used at any accredited U.S. institution
  - MS, PhD, both degrees
- **2010 - 2018:** 2,000 Fellowships yearly
  - 2016: ~16,800 Applications - ~12 % success rate
  - 2017: ~13,200 Applications - ~15 % success rate
  - 2018: ~12,400 Applications - ~16 % success rate

# GRFP Benefits

## Five Year Award – \$138,000

- Three years of support
  - \$34,000 Stipend per year
  - \$12,000 Educational allowance to institution
- Professional Development Opportunities:
  - GRIP: Internships at federal agencies
  - INTERN: other internships
- Supercomputer access: XSEDE
- Career Life Balance (family leave)

*See GRFP Solicitation NSF 18-573*

### Graduate Research Fellowship Program (GRFP)

**PROGRAM SOLICITATION**  
NSF 18-573

**REPLACES DOCUMENT(S):**  
NSF 16-588

National Science Foundation

Directorate for Biological Sciences

Directorate for Computer & Information Science & Engineering

Directorate for Education & Human Resources  
Division of Graduate Education

Directorate for Engineering

Directorate for Geosciences

Directorate for Mathematical & Physical Sciences

Directorate for Social, Behavioral & Economic Sciences

Office of Integrative Activities

Office of International Science and Engineering

**Application Deadline(s)** (received by 5 p.m. local time of applicant's mailing address):

October 22, 2018

Life Sciences, Geosciences

October 23, 2018

Computer and Information Science and Engineering, Engineering, Materials Research

October 25, 2018

Psychology, Social Sciences, STEM Education and Learning

- \$5,000 research allowance for Fellows
  - Additional research support varies with host
- Access to facilities, equipment, field sites, etc.
  - New collaborations and expanded network
  - Skill development and exposure to different cultures

# Graduate Research Internship Program (GRIP)

## Current Hosts:

- Office of Naval Research
- Smithsonian Institution
- Department of Homeland Security
- Federal Bureau of Investigation
- Environmental Protection Agency
- National Oceanic & Atmospheric Administration
- U.S. Census Bureau
- U.S. Dept. of Agriculture
- U.S. Geological Survey

# INTERN (Dear Colleague Letter 17-091)

Supplement to NSF GRFP award for Fellows to gain knowledge, skills and experiences through internships in non-academic settings:

- Industry laboratories or industry research and development groups
- Start-ups
- Government agencies and National Laboratories
- Policy think-tanks
- Non-profit organizations

Also available to graduate students (with advisors supported by NSF) in Engineering, Education and Human Resources, and in the Office of Advanced Cyberinfrastructure (OAC; CISE)

## RESOURCES:

Application, guides, announcements,  
FAQs GRFP Website, [www.nsfgrfp.org](http://www.nsfgrfp.org)

Current & former Fellows 866-NSF-GRFP,  
[info@nsfgrfp.org](mailto:info@nsfgrfp.org)

To be a reviewer: <https://nsfgrfp.org/panelists>

# Postdoctoral Research Fellowships

- Allows Postdocs to serve as their own PI
  - Directorate/Division-specific; not all Divisions award them
  - Up to 2 or 3 years of funding (varies by division)
  - Choice of institution and mentor
  - Must be US Citizen or permanent resident
  - Provides both a Stipend and an Allowance (amounts vary by division and directorate)
- 
- Allowance used for:
    - Benefits
    - Travel
    - Publications
    - Research expenses

[https://www.nsf.gov/funding/education.jsp?fund\\_type=3](https://www.nsf.gov/funding/education.jsp?fund_type=3)

# Integrating Research and Education Training

**REU**

**NRT**

**RET**

**RUI, ROA, PUI**

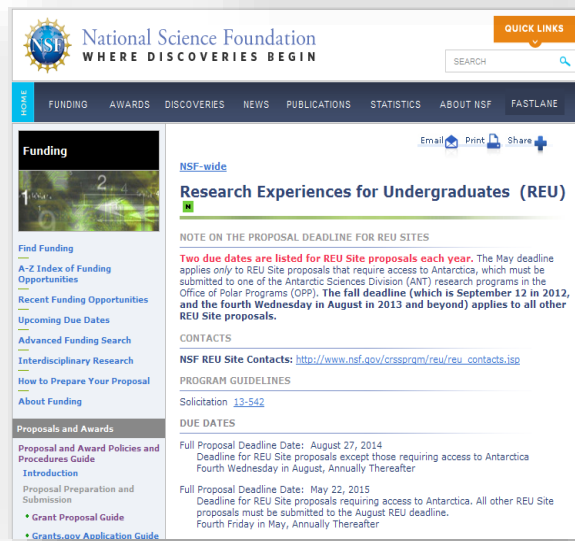

# Research Experiences for Undergraduates

NSF 13-542

## Goals:

- Initiate and conduct projects that engage a number of undergraduate students in research.
- Involve in research students who might not otherwise have the opportunity, particularly those from academic institutions where research programs are limited.

To search for an REU site, visit: [www.nsf.gov/crssprgm/reu/reu\\_search.jsp](http://www.nsf.gov/crssprgm/reu/reu_search.jsp)

# NSF Research Traineeship (NRT) Program 18-507

The **NRT Program**, encourages the development of innovative models for STEM graduate training

- Supports training STEM graduate students in high priority interdisciplinary research areas
- Supports professional development to foster an inclusive workforce ready to enter diverse STEM career

Letter of Intent Submission: Nov. 26 to Dec. 6, 2018

Full grant proposal due date: Feb. 6, 2019

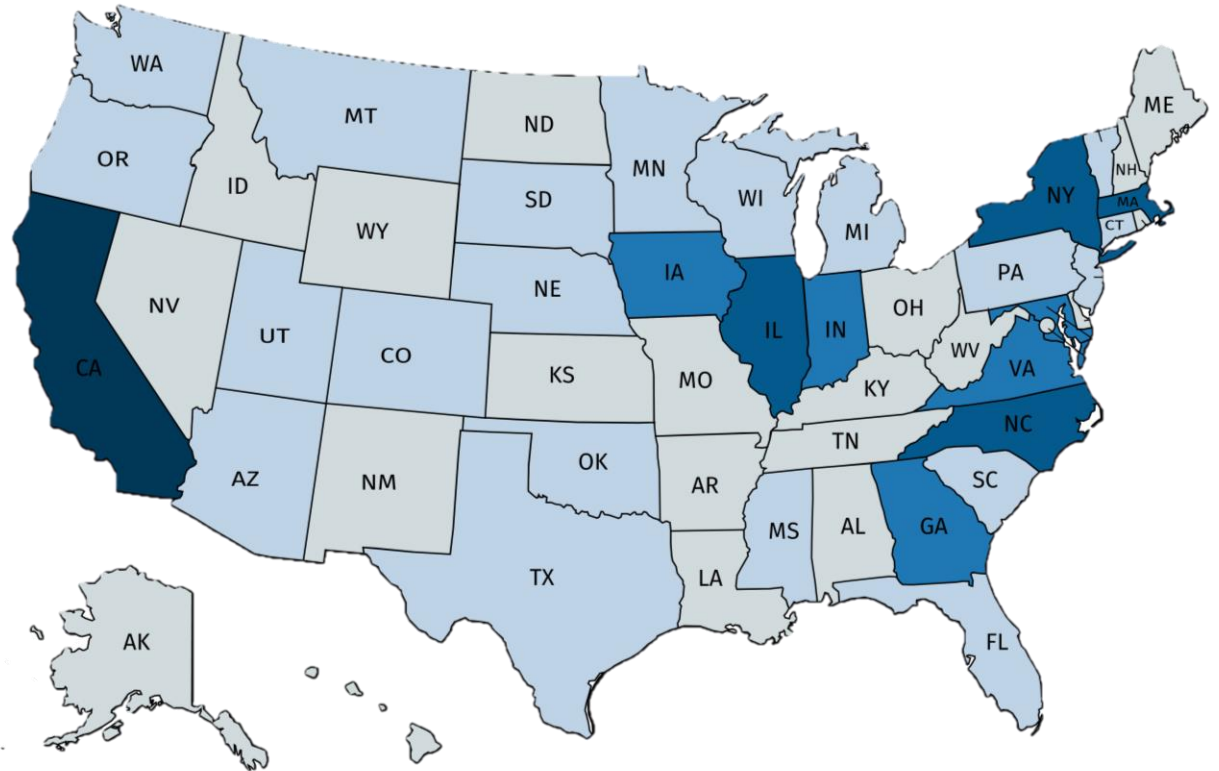

# NSF Research Traineeship (NRT) Program

## Awards

51 Funded Projects

30 States

# Research Experiences for Teachers

GOAL: Enable K-12 teachers and community college faculty to engage in STEM research and then adapt knowledge into their teaching.

- RET Sites and Supplements
- May be included in REU proposals
- Check Directorates for specific mechanism.

# Support for Undergraduates RUI, ROA for PUIs

RUIs and ROAs support research by faculty members at PUIs

PUIs = accredited institutions that award Associate's, Bachelor's, and/or Master's degrees but have not awarded > 20 Ph.D./D.Sci. degrees in all NSF-supported fields during the combined previous two academic years

ALL NSF directorates evaluate and fund RUIs and ROAs

They are funded within R & E program allocations

**14-579**

Directorate contacts found at : [http://www.nsf.gov/crsspgrm/rui\\_roa/contacts.jsp](http://www.nsf.gov/crsspgrm/rui_roa/contacts.jsp)

# Research Coordination Networks (RCNs)

Goal is to advance a field or create new directions by supporting groups of investigators to communicate and coordinate research, training, and educational activities across boundaries.

Does not support primary research activities

Deadline varies by program

Not all programs accept RCN proposals

Contact the relevant program before submitting RCN proposal

Program Solicitation – NSF 17-594

# Workshops

One mechanism to bring together different components of the research community (sectors, fields, nationalities) to address common areas of interest

- Discuss research directions, gaps, techniques, advances, approaches
- Share ideas and best practices
- Build connections and identify potential areas of collaboration
- Promote student/early career participation

Contact the relevant program before submitting a workshop proposal

# Infrastructure

**EPSCoR**

**MRI**

**STC**

**ERC**

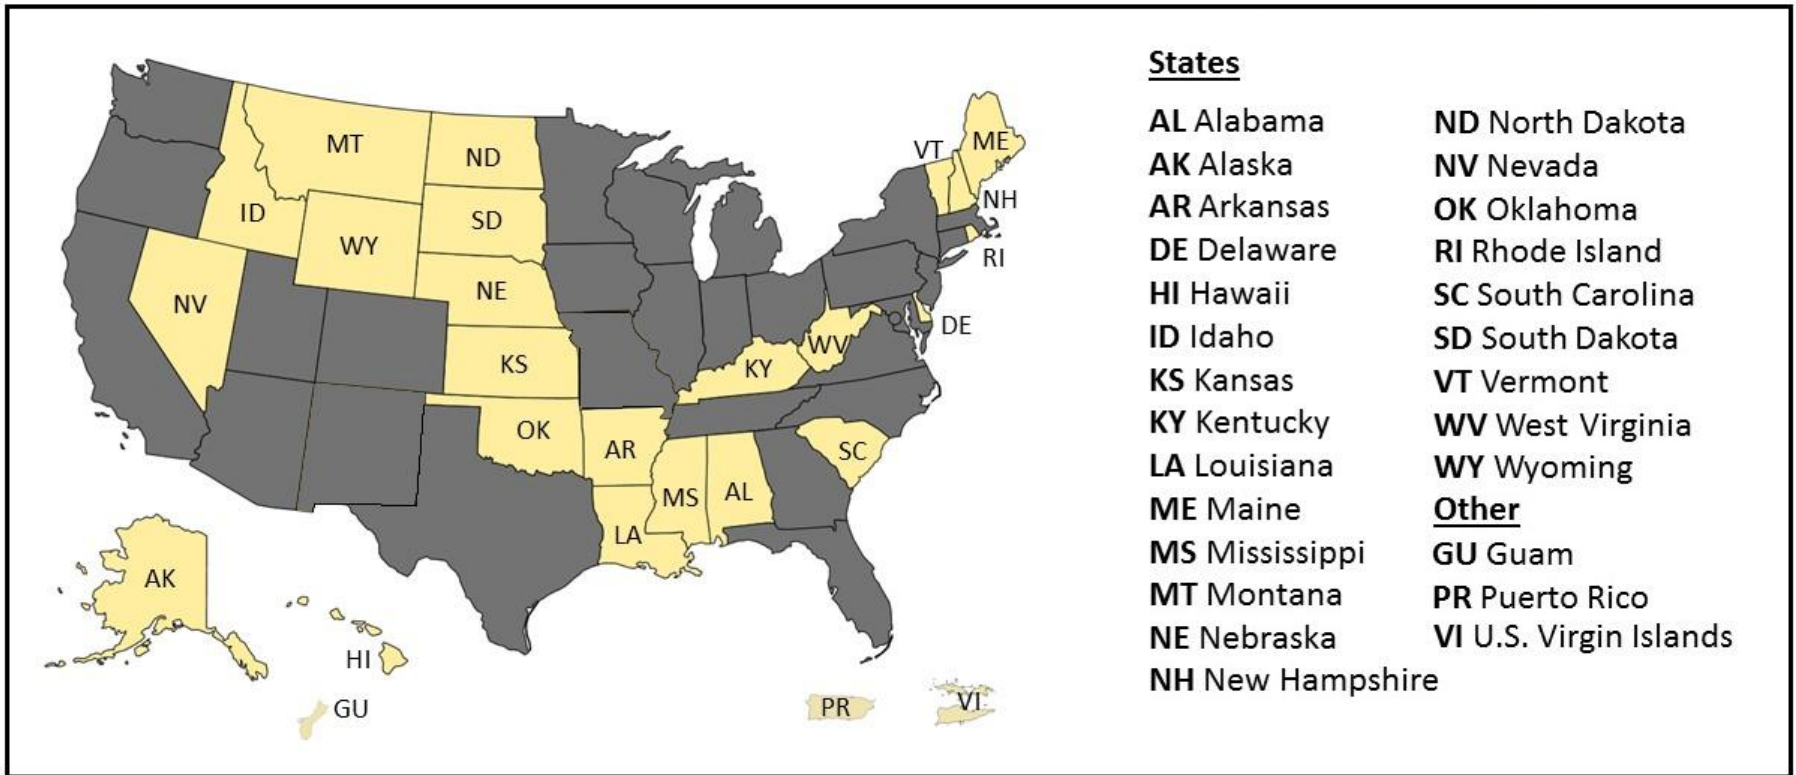

# Established Program to Stimulate Competitive Research (EPSCoR)

Enhances research capacity and competitiveness of targeted jurisdictions by strengthening STEM capability

# NSF EPSCoR FY18 Eligibility

EPSCoR states and other U.S. jurisdictions eligible for EPSCoR during FY 2018

# EPSCoR Investment Strategies

- **Research Infrastructure Improvement (RII)**  
Support physical, human, and cyber infrastructure
- **Co-Funding with NSF Directorates and Offices**  
Meritorious proposals reviewed in other NSF programs
- **Outreach and Workshops**  
EPSCoR Community-wide activities and NSF staff interaction

# EPSCoR & New Mexico

**EPSCoR funding since 2001: \$89.9 M**

\$60.0M in RII, \$29.8M in co-funding, and \$0 in outreach

NSF funding in FY 2017: \$51.7M; 92 awards;

24.3 percent success rate

New Mexico EPSCoR <https://www.nmepscor.org/>

NM RII Track-1 Award <https://www.nmepscor.org/about-science-focus>

# Major Research Instrumentation (MRI)

- **Acquisition or development** of research instrumentation (incl. cyber-infrastructure)
- **Shared-use/multi-user** instrumentation for **research** and **training**
- **Academic and private sector partnerships**

## FY 2018 MRI Competition

- Solicitation **NSF 18-513** (significant changes from prior years)  
**Full proposal window:** January 1, 2019 - January 22, 2019;  
January 1 - January 19, annually thereafter

# Science and Technology Centers, Integrative Partnerships (STCs)

- **Promote frontier investigations across and/or within NSF-supported S&E area**
- **Advance discovery and innovation through the integration of cutting-edge research, excellence in education, diversity, and transfer of new knowledge**
- **12 current STCs across all NSF disciplines – coordinated and co-managed by IA w other NSF Directorates**

# Engineering Research Centers (ERCs)

Funded **for 10 years at ~ \$4M/year** (a 5-year initial award / 5-year renewal)

Multi-university, cross-disciplinary academic collaboration

Driven by leading edge complex engineering challenge with significant potential societal impact

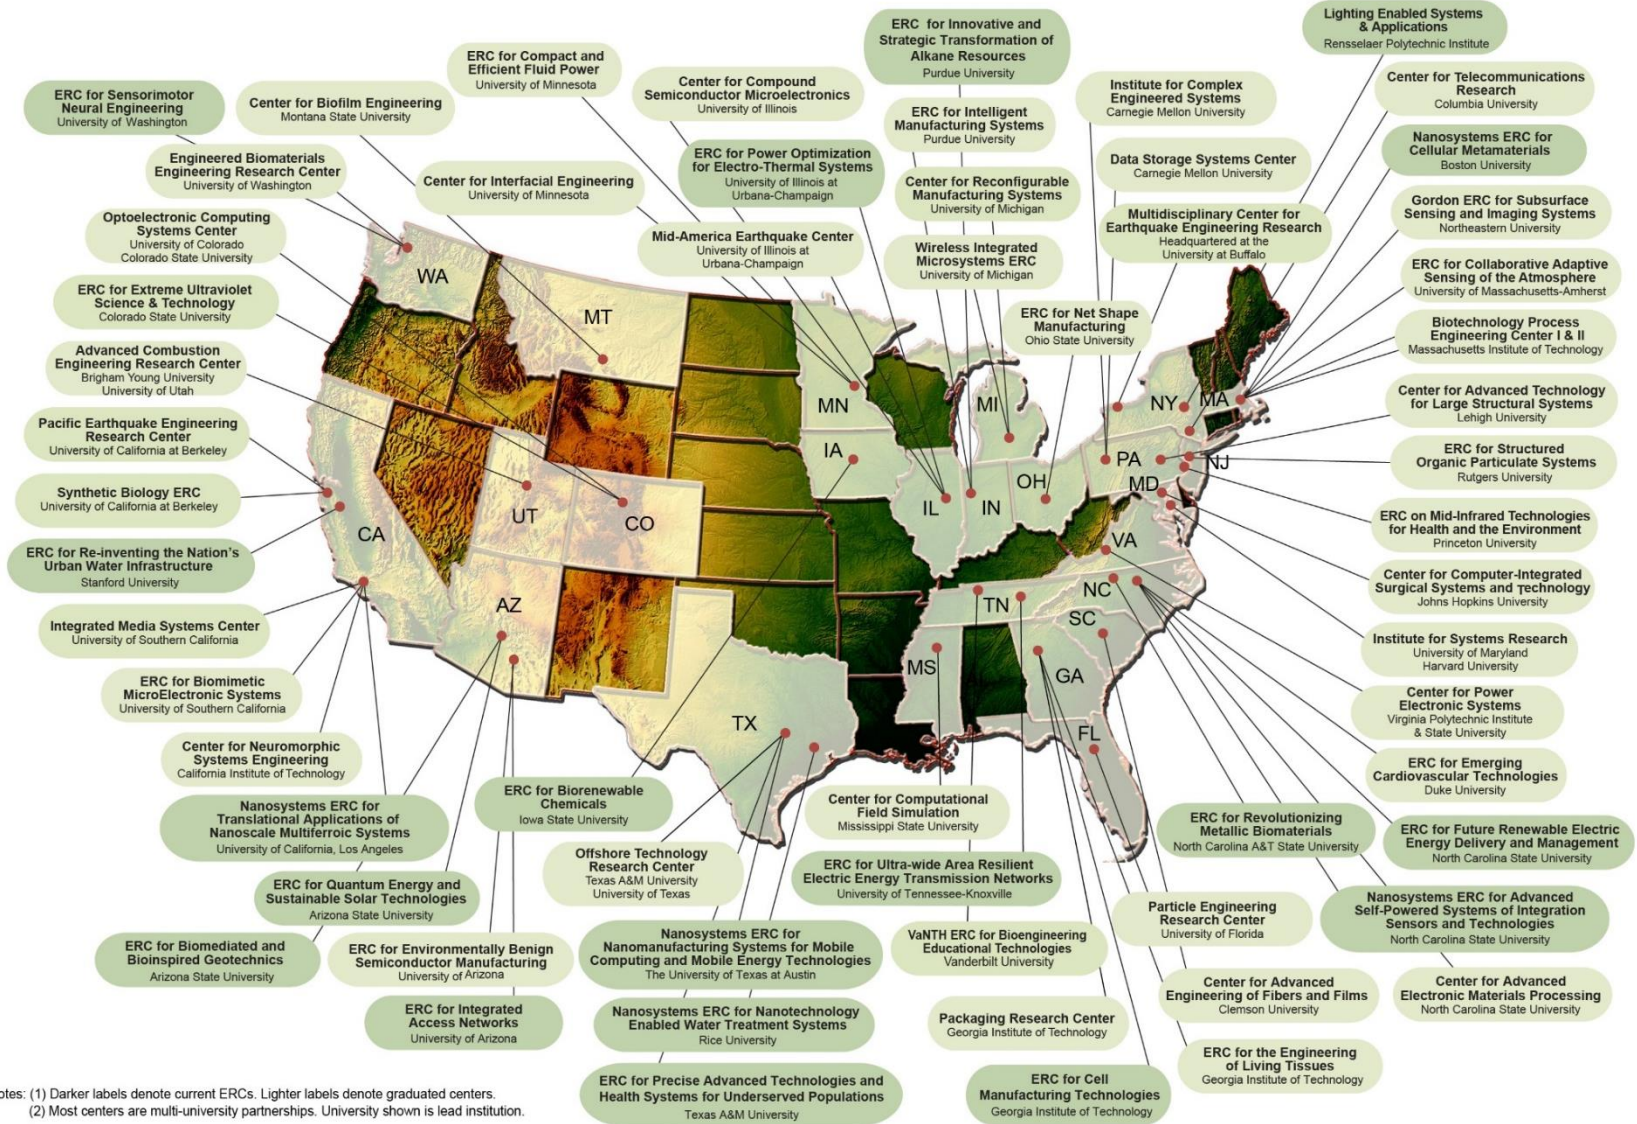

Additional support provided by industry, and other partners

Strong integration of research, education and workforce development, diversity and culture of inclusion and innovation ecosystem.

# Engineering Research Centers (ERCs)

Notes: (1) Darker labels denote current ERCs. Lighter labels denote graduated centers.  
 (2) Most centers are multi-university partnerships. University shown is lead institution.

# Engineering Research Centers (ERCs)

14 active ERCs -- 4 new ERCs awarded in FY17

- Innovative and Strategic Transformation of Alkane Resources, *Purdue University*

- Cell Manufacturing Technologies, *Georgia Tech*

- Cellular Metamaterials, *Boston University*

- Precise Advanced Technologies and Health Systems For Underserved Populations, *Texas A&M University*

- NASEM's report (2017):  
"A New Vision for Center-Based Engineering Research"

# Data and Cyber Sciences

**Big Data**

**NRI**

**SaTC**

# BIGDATA

**Goals:** Identify novel computation, statistical or mathematical techniques and technologies or novel analyses or experimental evaluation

Two categories for submission:

**Foundations:** Encourages fundamental techniques, theories, methodologies and technologies of broad applicability.

**Innovative Applications:** Encourages novel techniques, methodologies, and technologies of interest to at least one specific application (special requirements).

# National Robotics Initiative 2.0: Ubiquitous Collaborative Robots (NRI-2.0)

Expands the scale and variety of collaborative interactions.

FY 17 Participants  
CISE, ENG, SBE,  
EHR, USDA/NIFA  
DOE/EM, DOD

Open to US universities and colleges, as well as non-profit, non-academic organizations

# SaTC

## Secure and Trustworthy Cyberspace

- NSF's flagship program for research in cybersecurity
- Multiple NSF directorates: CISE, EHR, ENG, MPS, SBE
- U.S. colleges & universities, also open to US non-profits, and sometimes for-profits
- Proposal designations:
  - Core
  - Education
  - Secure, Trustworthy, Assured and Resilient Semiconductors and Systems (STARSS)
  - Transition to Practice (TTP)

# Translational Research and Commercialization

Basic Research

**\$7.8B**

**Division of  
Industrial  
Innovation and  
Partnerships**

**\$265M**

Translational Research

**Tech Translation  
Partnerships &  
Commercialization  
Driven Activities**

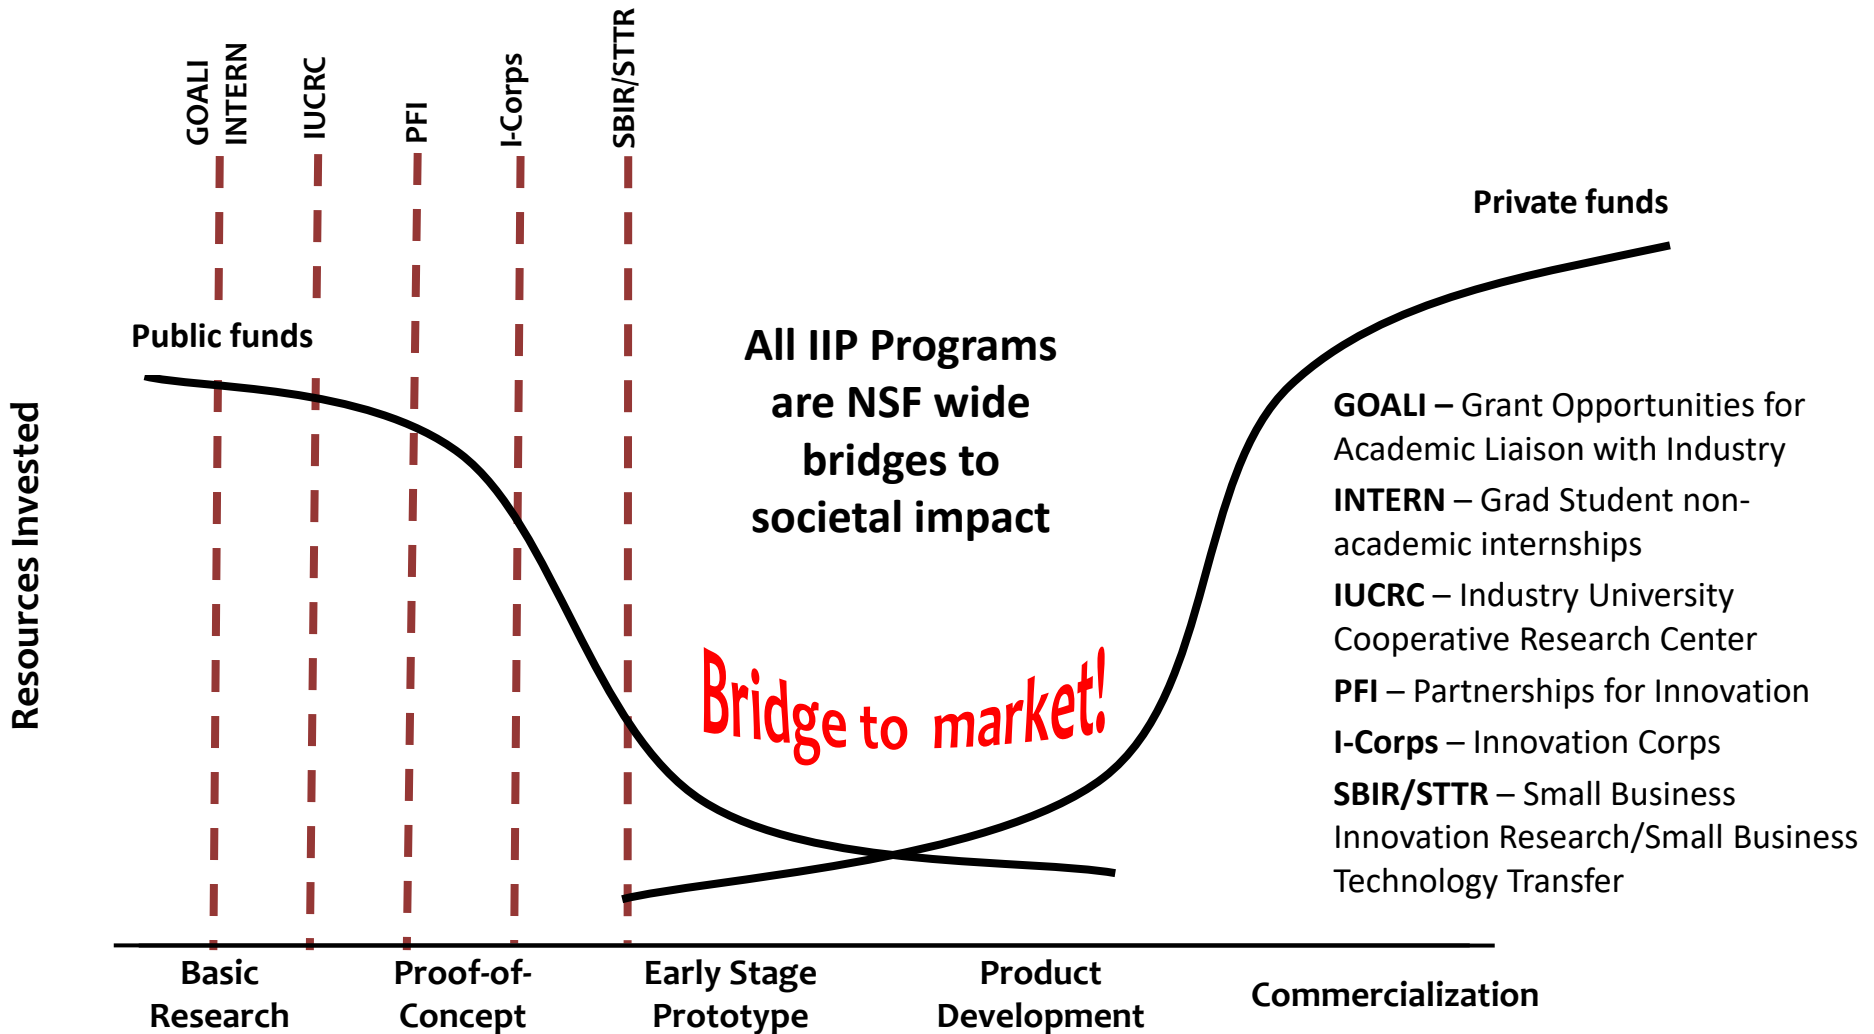

# Partnerships are Critical

# Division of Industrial Innovation and Partnerships (IIP)

## Driving basic research towards societal application

# Division of Industrial Innovation and Partnerships

A key NSF portal driving technological translation and innovation activities

- Build strong industry/University collaborations
  - Industry-University Cooperative Research Centers (IUCRC)
  - Grant Opportunities for Academic Liaison with Industry (GOALI)
- Prepare your graduate students for non-academic careers
  - Internships via INTERN supplements
- Build innovative technology from your research
  - through the Partnerships for Innovation (PFI) Program
- Plan your high-tech startup venture
  - via the Innovation Corps Program: I-Corps
- Commercialize technology via small business
  - Small Business Innovation Research (SBIR/STTR) Program

# GOALI Proposals – Key dimensions

- **Available NSF-wide** as a specialized type of proposal that can be submitted to most programs
- Typical grant is 3-5 years and \$100-150K per year.
- Basic research with strong academic-industry collaboration
- Requires an industrial partner (industry co-PI).
- Requires intellectual property agreement completed in advance of funding.

**Faculty & Students:**  
Industrial collaboration, education and training

**Industry:**  
Access top university research capacity and talent

**NSF:**  
Catalyze transformative research & collaborations

**Universities:**  
Build pathways to new/stronger links with industry

[https://www.nsf.gov/pubs/policydocs/pappg18\\_1/pappg\\_2.jsp#IIE4](https://www.nsf.gov/pubs/policydocs/pappg18_1/pappg_2.jsp#IIE4)

# INTERN – Non Academic Internships for Grad Students

Host organizations may include:

- Industry laboratories or research and development groups.
- Start-ups or small businesses.
- Government agencies and National Laboratories.
- Policy think-tanks.
- Non-profit organizations.

\$55K for up to 6 months of internship

Need an Intellectual Property agreement between university and Host

## **Grad Students:**

Access real world immersion

## **Industry:**

Mentor and access a new generation of talent

## **NSF:**

Catalyze workforce Development

## **Universities:**

Build pathways to new/stronger links with industry

**DCL:** <https://www.nsf.gov/pubs/2018/nsf18102/nsf18102.jsp?org=NSF>

**Due dates: May 1, 2019 (FY2019 funds) and May 1, 2020 (FY2020 funds).**

# Industry-University Cooperative Research Centers (IUCRC)

Collaborate strongly with industry  
Leverage Industry funding  
Industrial exposure to students/faculty

70+  
Centers

100+  
U.S. Universities

400+  
Large Companies

300+  
Small Companies

Federal & State  
Government Agencies

Industry-inspired Centers

PRE-COMPETITIVE RESEARCH!

## Broad areas of coverage

Advanced Electronics & Photonics

Advanced Manufacturing

Advanced Materials

Biotechnology

Civil Infrastructure Systems

Energy and Environment

Health and Safety

Information Communication & Computing

System Design and Simulation

# Partnerships for Innovation (PFI)

[www.nsf.gov/PFI](http://www.nsf.gov/PFI)

- Primary source of technology development funding at NSF for researchers in academia and non-profits
  - projects with *potential for accelerated commercialization*
  - proof-of-concept work
  - prototype development
- Support partnerships and multi-disciplinary innovation ecosystems
- Broadening participation, Professional development, mentoring on entrepreneurship and technology translation
- Drive basic research into a technology innovation phase!

# I-Corps™ - *Entrepreneurial training towards effective business model creation*

Most academic spinouts fail because they develop something

**NO ONE CARES ABOUT**

Do customers want something more efficient?

or maybe just cheaper?

or just smaller?

What problem does this solve for my customers?

How do they adopt new technologies?

Who make a purchase decision?

Is that a big problem?

or maybe just inconvenient?

How do I reach new customers?

The answers are not in the lab and not even on campus

# America's **SEED FUND** SBIR.STTR

- Awards \$200 million per year to roughly 400 small businesses/startups
- Supports research and development of groundbreaking, high-impact, high-risk technology
- Since 2014 NSF funded startups have raised \$3.5B in private follow-on investment!
